Admission of freshmen to the Iowa Regent universities is based on the Regent Admission Index (RAI) formula described below. In addition, applicants must meet the minimum high school course requirements for the university they wish to enter.

\[
(3 \times \text{ACT composite score}) + (30 \times \text{high school GPA}) + (5 \times \text{n}\text{umber of high school core courses})
\]

Regent Admission Index Score

Note: For purposes of calculating the RAI, SAT scores will be converted to ACT composite equivalents. 4.00 is the top value for GPA, and the number of high school core courses completed is expressed in terms of years or fractions of years (e.g., one semester equals 0.5 year). Applicants who do not possess all required factors will be evaluated on an individual basis by the Regent universities to which they apply.

Freshman applicants who achieve at least a 245 RAI score and who meet the minimum number of high school courses required by the Regent universities will qualify for automatic admission to any of the three Regent universities. Freshman applicants who achieve less than a 245 RAI score may also be admitted to a specific Regent university; however, each Regent university will review these applications on an individual basis and the admission decision will be specific to each institution.

### BALLARD COMMUNITY SENIOR HIGH SCHOOL, HUXLEY, CORE COURSES APPROVED FOR RAI

Source: 2018-2019 SRI Winter data. (Note: course numbers in parentheses refer to community college course numbers.)
